# MINES AND MINING STOCKS FINANCIAL AND COMMERCIAL

### A. F. HOLDEN HAS NEW ENTERPRISE

Buys Copper-Gold Mines in Shasta County, California.

RAILS NEARING NEWHOUSE

GOLD STRIKE REPORTED FROM CLOSE TO POCATELLO.

copper claims, comprising nearly 900 acres, and upon which more than 1,500 feet of work has already been done. Does Not Mention Return of the Batthe interests of a syndicate in which Boston operators predominate, and the

Boston operators predominate, and the anderstanding is that a company will be shortly incorporated under the laws of Maine to operate the property. The stock of the company will be listed on the Boston stock exchange.

Twice, at least, during the past six months, Mr. Holden has been in California, and the news from Boston explains his presence there more nicely than did his explanation that he had been visiting with his children. No instimation has previously reached this city that Mr. Holden had decided to enter the Shasta county field, but now that he is there it may be taken for granted that he thinks a whole lot of it and that it will not be long till there is something doing at the Mammoth, where it is known that large bodies of copper ore, running well in gold, have already been opened up.

The property secured by Mr. Holden is in the same section as the properties of the Mountain Copper company, a foreign corporation that is producing about 15,000,000 pounds of copper annually; Captain, J. R. De Lamar's Bully Hill, with its production of 8,000,000 pounds; the great Balaklala, owned by P. L. Kimberley Trank H. Buhl, W. F.

pounds; the great Balaklala, owned by P. L. Kimberley, Frank H. Buhl, W. F. Snyder, E. L. White of the Bingham Consolidated, and others; the Trinity Copper company and other properties

It is said that the copper belt of Shasta county is the largest in the United States and that, size of the deposits considered, the ores are the richest. The outcome of Mr. Holden's latest terest in this city.

### RAILS NEARING NEWHOUSE. Expected Line From Frisco Will be Completed This Week.

M. M. Johnson, manager of the New-house company's mines in Beaver county, returned from camp Sunday morning and was followed by Lafayette Hanchett, chief of Mr. Newhouse's staff, and Professor S. F. Emmons yesstaff, and Professor S. F. Emmons yesstaff, and before long he terday morning. Mr. Johnson reports experience and says the tracklayers on the line. In

eircle. The works can be concentrated easily and moved along inside lines. The Japanese, on the other hand, are outside and therefore much dispersed. The Russians, it is claimed, will be still better when they retire from Anshanshan. The Japanese are ever showing a desire to close the circle from the north, simulfaneously moving from west and east toward Yantai, Mukden and Ta pass. Under the present circumstances it is believed that this task is beyond their strength, at least until the fall of Port Arthur restation that there was no copper by say without nestation that there was no copper by the building of the road will follow in a pound for the metal we could not give building of the road will follow in a pound for the metal we could not give pleted.

The road will be built through Columbia, directly to the January, the company and the market was unusually healthy, though the demand was continued to be seems to exist among the foreign selling agencies, copper suffered a fraction that there was no copper by the demand and pound for the metal we could not give pleted.

The road will be built through Columbia, directly to the January, the pleted.

The road will be built through Columbia, directly to the January, the pleted.

The road will be the road will follow in a pound for the metal we could not give you any," said a representative of the company. Another selling agency stated that the market was unusually be lead that the market was unusually combination and Jumbo mines and to Goldfield. The management does not intend to be selling agency to the road will be built through Columbia, directly to the January.

In spite of the sentiment which seems to constant that the market was no could not give yet show in a pound for the metal we could not give yet should not give yet sh

from the north, simultaneously moving from west and east toward Tanta, Mukden and Ta pass. Under the present circumstances it is believed that this task is beyond their strength, at least until the fall of Port Arthur releases a large number of troops.

DANGER HITHERTO UNKNOWN, Japanese Sowed Floating Mines During the Battle.

St. Petersburg Aug. 15, 1:52 p. m.—The Novoe Vremya's naval expert, reviewing the incidents of the seasifish of Aug. 16, 8 says:

"Admiral Togo's first division salied out from the Elliott islands or Tallenwan, and arrested Admiral Without's progress, utilizing the enormous supports to attack the branese in torpedo out from the Elliott islands or Tallenwan, and arrested Admiral Without's progress, utilizing the enormous supports to attack the branese in torpedo with the paralyzed Withoeft's movements, as it was almost impossible to detect the floating mines without stationing a lookout in the bows, which necessitates exposing the men to almost certain death. This presumably caused Withoeft's movements, as it was almost impossible to detect the froating mines without stationing a lookout in the bows, which necessitates exposing the men to almost certain death. This presumably caused Withoeft's movements, as it was almost impossible to detect the froating mines without stationing a lookout in the above the time of the year. The sound of the men to almost certain death. This presumably caused Withoeft's movements, as it was almost impossible to detect the froating mines without stationing a lookout in the above the complete of the admiral and the other officers, the squadron successfully avoided a danger such as sever before encountered, but the remainder of Admiral Togo's firet came up, compaling a general engagement do that there is less than 45,00,000 pounds that there is less than 45,00

superiority of their torpedo boats - What is probably the strongest argu- market value of the ore, and if he finds

thirty to eight. Their artillery also was stronger by half as many guns, and their secondary batteries by a third more than their main batteries. The Russians had the advantage, however, of the disposition of the big guns on the Czarevitch, Poltava and Sevastional the strong force of their fire affi opol, the strong force of their fire aft nabling them to punish the enemy schind. The battle at this stage was imited to a long range firing, in which the twelve-inch guns had a monopoly It was at this time that the Czarevitch It was at this time that the Czarevitch was crippled and the others gathered around to protect her. It was the crucial period. The Japanese, according to their custom, concentrated their fire on the flagships, the Retvizan and Czarevitch, which were both crippled."

### Some Guesswork.

The writer adds that he believes the Advices from Boston are to the effect that A. F. Holden, managing director of the United States Mining company, has invaded the big copper district of Shasta county, California, and pursuant forms of the Value of Shasta county, California, and pursuant forms of the Value of Shasta county, California, and pursuant forms of sold the Value of Shasta county, California, and pursuant forms of sold the Value of Shasta county of Shast chased the Manmoth group of gold- | caped and probably are heading for Vladivostok.

### MESSAGE FROM STOESSEL.

tleships.

The telegram fails to clear up the whereabouts of three warships reported here to be coaling at Tsing Tau. LITTLE PITTSBURG STRIKE.

Opening of New Ore Body Delayed For Want of Timbers.

Daniel Doyle, superintendent of th Little Pittsburg company's property at Alta, is in the city on business con-nected with the mine. The recent strike of a body of sulphide ore on the lower tunnel level, he says, has not been followed up for the past few days on ac-count of the non-arrival of timbers. During the present week, however, he will be in shape again to push ahead and he has no doubt of the results that

expects to have good news from there,

In the main drift from the lower tunbetween Frisco and Newhouse are getting along well. He expects to see the new road completed by the end of the new road completed by the new road complete the new road com

shan, whence the Japanese tried to ford to Bensihu, which is defended by The Russians.

The road thence turns toward the Yan Tai mines and the railroad north of Liao Yang.

The Japanese also occupy Tziantchan, opposite Dapindoushan, on the Samatzi road over the Taipin pass and thirough Sintezintin to Mukden.

There are constant reports that the Japanese are moving large forces on the railroads to Simmlatin and that they are bringing up pontoons to cross the Liao river, thus threatening the Mukden and Liao Yang railroad.

From this it is easy to perceive that the Russian strategical position is very good. They occupy, with Liao Yang as the center, a fortlied semicire. The works can be concentrated easily and moved along inside lines. The Japanese, on the other hand, are

ment in favor of the claims advanced by some of the selling agencies that there is no copper in sight aside from that which is used to supply regular customers, is the belief that copper extended by some of the selling agencies that the mining field of Utah without delay, as he claims to have plenty of the material.

That it can be sold at a profit, he promises to open a new industry in the mining field of Utah without delay, as he claims to have plenty of the material.

Metal Market. ports for August will show an unpre-cedented tonnage. According to the contracts now in hand, the shipments will probably aggregate 40,000,000

The United States is now producing approximately 65,000,000 pounds of copper a month. This estimate is an 8 per cent increase over last year's output. With exports figured, at 40,000,000 pounds, or 20,000 tons, and home consumption at 15,000,000 pounds, it appears that the copper market is being picked bare of metals.

Naturally, home consumption is unusually dull, and while the amount used in August by the domestic consumer may exceed the figures given, it is doubtful that more than 15,000,000.

it is doubtful that more than 15,000,000 pounds will be taken off the market by the American buyers. Even with such conditions prevailing at home, there is little opportunity for copper to accumulate beyond the quantity that any large buying order will absorb.

The Calumet & Hecla company of

Michigan, one of the largest individual copper producers in the United States, is all sold out of copper till October 1. Exports of copper for the present year, figured in tons, are as follows: Januarly, 29,085 tons; February, 17,032 tons; March, 22,852 tons; April, 13,567 tons; May, 14,377 tons; June, 16,179 tons; July, 18,770 tons.

### CUT-OFF IS NO GO.

Tonopah Mines Not Likely to Secure Shorter Haul to This Market.

Reliable information reaches the Car son News that the talked of cut off from the C. & C. to Hazen on the Central Pacific will not be built. Much has been said of this project, and it was claimed that it would greatly shorten the haul of Tonopah ores. It seems, however, that the published accounts of the advantages to be obtained by this cut-off were largely exaggerated and the gain would be so little that it would not pay for construction.

Again, the cut-off would be built, if built at all, upon the assumption that Tonopah ore is to be shipped to Salt Lake, and while such may or may not be the case at the present time, there could be no assurance that the Tonopah mines would care to do so for large the case at the present time, there could be no assurance that the Tonopah mines would care to do so for large the case at the present time, there is a supplied to the case at the present time, there is a supplied to the case at the present time, there is a supplied to the case at the present time, there is a supplied to the case at the present time, there is a supplied to the case at the present time, there is a supplied to the case at the present time, there is a supplied to the case at the present time, there is a supplied to the case at the present time, there is a supplied to the case at the present time, there is a supplied to the case at the present time, there is a supplied to the case at the present time, there is a supplied to the case at the present time, there is a supplied to the case at the present time, there is a supplied to the case at the present time, there is a supplied to the case at the ca ever. This will be good news to Car-son City and vicinity, for it practically insures a continuance of through business to Tonopah by the present roue.

### NETTING \$1,000 A DAY.

E. E. Abercrombie, vice president of the Boston Consolidated company, who has just reached Boston, says of the property:

"The Boston Consolidated has thoroughly demonstrated its right to be classed among the producing mines of Utah. Last month it produced 6,600 tons of ore, which was treated at the Boston company net earnings of \$1,000 per day.

"Paorle."

Of the business which kept him so long away Mr. Richter said he was not at liberty to speak at this time, though he was confident that the near future he was confident in the property.

He says there is a great deal of interest taken in western mining affairs at the present time and he looks for a general revival during the next six months.

Utah The Boston Consolidated has thoroughly demonstrated its right to be classed among the producing mines of Utah. Last month it produced 6,600 tons of ore, which was treated at the Boston company net earnings of \$1,000 tons of ore, which was not at liberty to speak at this time, though he was confident that the near future he was confident that the near future he was confident that the present time and he looks for a general revival during the next six months.

"People have the impression that the Boston Consolidated is a low-grade 3 per cent copper, with gold and silver values, and few mines in Bingham

have a better showing.
"We will continue shipping 275 tons

andlansan.

Opposite Auping the Japanese occuy Goutzyatszi. On the Taitzi river
he Japanese outposts occupy Daodinhan, whence the Japanese tried to
ord to Bensihu, which is defended by
he Russians.

The road thence turns toward the
an Tai mines and the railroad north

Rounced in all the grades of councy of conversions and the rock shown by them to

### TAKES NEEDED VACATION. will probably aggregate 40,000,000 Joseph Henshaw Leaves For the East pounds. The United States is now producing

This Afternoon.

Joseph Henshaw, the personal representative of A. B. Lewis, who has been held close to his desk for the past year and one-half and who has been enjoying anything but good leath for several months past, largely on account of his close confinement, will leave for the east today. Mr. Henshaw will make his first stop at Chicago where he expects to meet Mr. Lewis, on Thursday. The latter is on his way west and it is Mr. Henshaw's understanding that he will arrive in Salt Lake early next week.

From Chicago Mr. Henshaw expects to go to Hot Springs, Ark, where he will endeavor to rid kimself of the rheumatism that has been bothering him so much of late. Before returning he will most likely go on to New York and other eastern points and renew accommitted.

and other eastern points and renew acquaintances with a number of old-time friends. Mr. Henshaw's host of friends here hope to see him return six weeks or two months hence in perfect health.

### BULK ORES FROM TONOPAH. Big Companies Starting Out Train-

loads For Salt Lake. Bulk ore from the Tonopah com-pany's Mizpah mine to the amount of fourteen carloads will have been started for the Salt Lake smelter by the time the Sun reaches its readers today, says last Wednesday's Tonopah

Sun. Eight cars had already gone this morning and six more were to be ready by this evening.

Witkin a week the railroad spur will have been completed to the Montana-Tonopah dumps and that mine will then begin shipping bulk ore. Other adjacent mines will soon follow in do-

ing the same. Sacked ore shipments from the sta-tion are going on more rapidly than

### BACK FROM THE EAST.

Albert Richter, the mining engineer and metallurgist who has been east on mining business for the past six weeks, is home again and within another day or two he will leave for the southern country to conduct an examination of property for eastern clients.

Boston, Aug. 15.—Coppers strong but rather inactive, due largely to tomorrow's holiday.

Walter James, the Black Rock business and mining man, is up from the south on a snort desiness errand.

Two carloads of lease ore from the Urcle Sam company Humbug property were reported in the market yesterday.

Five cars of ore from Tintic, three from Bingham, and two carloads of copper matte from the Ladd Metals company's smelter at Mineral, Idaho, were released from the Taylor & Brunton sampler yesterday morning.

John Wise, vice-president, and Charles Micehle, manager, of the Hardanger, Gold Mining & Milling company, left last night for Park Valley to examine the recent strike in the company's property.

The delinquent sale of Wabash stock

Goldfield News.—A new company that primises to be a winner is the Goldfield Bonanza. It owns several claims four and one-half miles from Goldfield and we have seen some fine pannings of free gold off the claims. There are more than ten ledges on these claims and the company will no doubt make a mine. The company is composed principally of Salt Lake gentlemen who are fortunate in securing such valuable property.

### STRENGTH WAS DISTRIBUTED

PROFIT TAKING DID NOT HOLD PRICES BACK.

pendent companies. Southern Pacific was also under constant pressure to take profits and made its highest price on the running quotations and at the cpening. The efficient Tractions were feverish and irregular throughout the day in spite of the violent advance of interborough transit on the curb. The unsettling influence of these exceptions to the day's strength gained force and the amount of selling for profits also diminished the disposition of the professionals to support the market. This made the closing easy at reductions running to a point for the active stocks from the high prices of the day.

Bonds were irregular. Potal sales, par valge, \$4.75,000. United States bonds were unchanged on call.
